ACG UX internship (m/w): Industrial Design • User Interface Design • Packaging Design

Agilent Technologies – we stand for high-tech and laboratory expertise around the world. As a worldwide company based in Santa Clara (California/USA), in the heart of Silicon Valley, we offer instruments, software, services and supplies for the entire workflow in the analytical laboratory. Our solutions and products are being used for the development of new drugs, for food testing, in cancer research and in doping control. We inspire discoveries that advance the quality of life. At our German headquarters in Waldbronn we develop, produce and market leading comprehensive analytic solutions.

You will join the team of the Agilent Usability & Design Center and be involved in all phases of our design process. You will support projects teams that develop instruments and supplies as well as software user interfaces, working closely with colleagues from different departments - as the voice of the user. Located at our Waldbronn site near Karlsruhe in the northern Black Forest, you will work internationally with engineers, scientists, marketing and other experts from our different sites around the globe, in the US.

Your responsibilities:

Your task will be to analyse user workflows and to design laboratory solutions. Depending on your experience & skills your focus is either on instrument hardware, or on software user interfaces or on accessories/packaging or a combination of all these areas.

You will develop ideas and concepts with the focus on usability and regarding ergonomic, technical & user requirements. Integrated in a team of experienced designers you will be entrusted with all the typical tasks of an UX designer and be involved in all phases of our design process., Europe, Asia and Australia.

Duration: from approximately around March 2018 - August 2018 (flexible)  
Mandatory or voluntary internship

Your qualifications:

- You are studying towards a degree in Industrial Design, UI Design or similar (ideally 4th-8th semester) or you have just recently graduated
- Good knowledge in CAD, Adobe CC and/or UI prototyping software
- Excellent communication skills
- Fluency in English or German necessary, ideally both
- Technical affinity

We offer you an attractive compensation and professional conditions for you to realize your ideas with the opportunities an international company provides.

Please send your Motivation letter, CV & portfolio per email to: [Linda.moll@non.agilent.com](mailto:Linda.moll@non.agilent.com).

We look forward to receiving your application!
