The Master Courses of the University of Art and Design Burg Giebichenstein are directed at graduates with BA and “Diplom” degrees with a primarily artistic / design emphasis. Interested and well qualified graduates from other courses of study can be admitted if their suitability was ascertained.

Please note: All our programs are taught in German!

Duration of MA studies

The duration of the MA course is variable and depends on the duration of the previously completed degree: it can range from a two-semester course (if applicants have a four-year BA degree of the same subject with 240 ECTS credits or a comparable “Diplom”) to a four semester course (if applicants have a three-year BA degree or a “Diplom” of the same subject, as well as for graduates of different artistic / design or other disciplines)

Upon successful completion, students receive the title of Master of Arts.

Objective of MA studies

The MA courses are project-oriented and offer students a comprehensive opportunity to further explore the theoretical and practical aspects of their respective disciplines and to implement them individually in their project work. The high quality equipment, including a variety of specific workshops on the design campus, offers intensive support of the design process through practical experimentation. Generally, the students can propose their own projects or choose from several projects options taken from their respective master’s course. In addition, there are interdisciplinary modules looking at theory-based design issues, professional and social questions or artistic / design themes. Thus students have a variety of options to choose from, when determining their individual field of emphasis and course profile. The highly communicative atmosphere on the design campus and the close contacts of students and teaching staff from other MA courses and from the art campus inspire an active exchange. In many MA programs, transdisciplinary work is explicitly encouraged.

The objective of every master’s degree course is the preparation of the student’s individual MA thesis.
